EXPERIENCE

Green Pipe Analytics | *IT Consultant & Full Stack Web Developer* | January 2024 - Present

- Developed responsive, high-performance MERN-stack applications (MongoDB, Express.js, React.js, Node.js), improving clients' online presence and engagement.
- Built scalable back-end services, utilized GraphQL and Apollo for dynamic data querying, and implemented caching (Redis) to optimize performance and reduce latency.
- Maintained code quality with ESLint, Prettier, and Jest, and safeguarded applications with JWT authentication and best-in-class security practices.
- Created visually appealing mobile-first interfaces using Tailwind CSS and DaisyUI, ensuring excellent user experiences across devices.
- Deployed and managed hosting environments with 99.9% uptime, including domain and DNS configurations.
- Integrated analytics pipelines to support data-driven insights and machine learning initiatives.
- Provided IT consulting services, including Azure Active Directory (Entra ID) tenant creation, Microsoft 365/Google Workspace email tenant setup, and comprehensive Azure resource management frameworks.
- Collaborated closely with clients to understand business objectives, deliver tailored solutions, and offer ongoing support and training.

Stan Weaver & Company | *Director of Information Technology* | June 2022 - July 2024

- Managed the integration of Cors-Air's IT infrastructure into Stan Weaver's systems, improving workflow efficiency by 20% post-merger.
- Upgraded servers and networking technologies, leading to a 15% increase in operational efficiency.
- Established a shared domain and migrated Cors-Air users within a hybrid cloud environment, enhancing accessibility and system compatibility.
- Migrated Cors-Air's email tenant to Stan Weaver's Microsoft 365 tenant, consolidating email systems for better management.
- Implemented necessary DNS changes and domain modifications, including updating DNS records, adjusting domain controllers, and reconfiguring group policies.
- Enhanced business intelligence by 40% through developing machine learning models and Power BI workspaces.
- Reduced data processing time by over 25% by implementing data pipelines using Azure Cloud resources.
- Cleaned and optimized ERP data for improved usability in machine learning and business intelligence applications.
- Increased user satisfaction by 50% by implementing comprehensive CRM and help desk solution using HubSpot.
- Built a help desk system with key performance indicators (KPIs) and developed a comprehensive knowledge base to improve support and service delivery.
- Maintained optimal hardware and network conditions by overseeing daily operations and implementing monitoring tools to track system performance.
- Created an ELK stack (Elasticsearch, Logstash, Kibana) to monitor performance, improve system monitoring and issue resolution.
- Reduced potential downtime by 25% through refining disaster recovery and business continuity plans.
- Improved data center uptime by 15% and reduced operational costs by 20% through proactive maintenance and optimizing power and cooling systems.
- Led a team of six IT professionals, providing guidance and mentorship to ensure high performance and professional growth.
- Enhanced cybersecurity awareness by conducting email phishing campaigns, reducing the risk of attacks.
- Ensured data integrity and availability by managing backups through AWS, Wasabi, and Veeam.
- Directed the planning and implementation of two small data centers, ensuring optimal environmental conditions (temperature, humidity, airflow).
- Modernized IT infrastructure by creating a hybrid data center with Azure Cloud resources, migrating the RDS Farm to Azure, and integrating DUO authentication for enhanced security.
- Improved security and streamlined user access by implementing Azure Active Directory with Role-Based Access Control and integrating with Intune for device management.
- Reduced communication costs by 60% by implementing RingCentral's VoIP, enhancing reliability and user experience.

Infotect Design Solutions (CSP) | *Network Engineer* | February 2022 - June 2022

- Developed skills in network infrastructure development and security implementation.
- Managed network maintenance and troubleshooting and provided training to junior employees.
- Ensured quality networks by collaborating with clients and tech support services.
- Filled the gap in network infrastructure development and security, ensuring reliable network performance for clients.
- Developed and installed network infrastructure, configurations, and equipment.
- Implemented data security systems, including firewalls and backups.

- Monitored network and troubleshoot issues or outages.
- Performed routine network maintenance, including upgrades and service packs.
- Consulted with clients to suggest network solutions.

ITS Group (MSP) | *Network Specialist* | January 2021 - February 2022

- Gained expertise in supporting many workstations and servers across multiple clients.
- Managed contracts for VPN configurations and systems management and provided day-to-day technical support.
- Ensured stringent security standards and supported desktop/laptop users to enhance their IT experience.
- Filled the gap in IT support and infrastructure security, ensuring continuous operation and security of client networks and servers.
- Supported 1300+ workstations and 300+ servers across 30 clients.
- Installed, modified, tested, and serviced data communications and LAN/WAN equipment.
- Supported desktop/laptop users, including troubleshooting and maintenance.
- Installed, configured, and troubleshooted servers, storage, email, backup, and telephony solutions.
- Ensured and maintained stringent security standards.

United States Navy | *Aviation Machinist* | DoD Security Clearance- Secret | January 2011 - October 2019

- I learned to maintain and service aircraft engines, fuel, and lubrication systems, and gained experience in helicopter maintenance and jet engine performance evaluation.
- Performed complete aircraft engine repairs and maintenance, managing the servicing of aircraft ashore and aboard ships.
- Ensured the reliability and performance of aircraft engines through rigorous maintenance, providing technical expertise and support.

EDUCATION

University of South Florida | 2025-2026

B.S. in Computational and Applied Mathematics

University of Texas at Austin - Center for Professional Education (CPE) | 2023-2024

Full Stack Web Developer

Hillsborough Community College | 2018-2019

A.S. in Computer Engineering

Hillsborough Community College | 2016-2018

A.A. in Computer Science

CERTIFICATIONS

CompTIA: Network+

Microsoft Certified: Azure Administrator Associate, Azure Security Fundamentals, Azure Data Engineer Associate, Azure AI Engineer Associate.

Stanford University: Machine Learning Certification

Cisco: CCNA in progress.

PMI: PMP in progress.

SKILLS & TECHNOLOGIES

Programming Languages & Frameworks:

Languages: C, C#, JavaScript, Python, Bash

Frameworks & Libraries: Express.js, React.js, Next.js, Node.js, GraphQL, DaisyUI, Tailwind CSS, Scikit-Learn, NumPy, Matplotlib, Webpack

APIs: REST, GraphQL

Databases: MariaDB, MySQL, PostgreSQL, MongoDB, Redis

ORM/ODM: Mongoose ODM

Cloud Platforms & Virtualization:

Cloud Platforms: Google Cloud Platform (GCP), Azure Cloud Resources

Virtualization & Containers: Hyper-V, VirtualBox

Networking & Infrastructure:

Networking Technologies:

Switches: Cisco Catalyst, Cisco Meraki, Cisco Small Business, Aruba, Mellanox, Dell Power Switches

Protocols: DHCP, DNS, TCP/IP, VLANs, VPNs, IPsec, RDP, VoIP, Wi-Fi, FTP, SSH, RPC, POP3, IMAP, SMTP, MQTT, WebRTC, HTTP, WebSockets, UDP

Security: Proxy Servers, Firewalls (Sophos, SonicWALL, WatchGuard)

Servers: DataOn, HP Proliant, Dell PowerEdge

Power & UPS: APC Symmetra, Dell MD PowerVault

Web Technologies: Apache, IIS

Systems & Security Management:

Operating Systems: Windows (XP, 7, 8.x, 10, 11, Server 2003–2022), SUSE Linux Enterprise Server, OpenSUSE

Identity & Access Management: Active Directory Federation Services (AD FS), Entra ID, Active Directory, Group Policies, IAM

Mobile Device Management: ManageEngine, Microsoft Intune

Security Tools, Monitoring & Analytics: 1Password, DUO Authentication, Proofpoint (Email Security), Intermedia (Email), Wireshark, ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana, Plausible Analytics

Backup & Recovery: Veeam, Wasabi, Amazon S3

Business Applications & Tools:

Enterprise Resource Planning (ERP): FACTS, COPS

Customer Relationship Management (CRM): HubSpot, Tiger Paw

Professional Services Automation: CenPOS, RangerMSP

Building & Infrastructure Management: ASHRAE BACnet

Project Management & Collaboration: Jira, Obsidian, Scrum, Agile

Productivity Suites: Microsoft 365, Google Workspace

Surveys: CSAT, ESAT

Data & Analytics:

Business Intelligence: Power BI

Machine Learning: Polynomial Regression, Logistic Regression

ORGANIZITIONS

Open Web Application Security Project (OWASP)

Activemember: 2024 - present adam.nuccio@owasp.org

RECOGNITIONS

- *2009 High school notable*
- *2009 Eagle Scout*
