Summary

Applied ML engineer leveraging Data Science and Natural Language Understanding techniques, who shipped production document intelligence on AWS (serverless; Textract, Comprehend, Bedrock), including RAG and LLM evaluation; delivered measurable latency and quality gains. Research interests: stochastic processes, time series, optimization, NLP/RAG evaluation & reranking. Seeking Summer 2026 ML Engineering internship. Strong math foundation (B.S. Computational & Applied Mathematics, in progress). Former IT director; previously held DoD Secret clearance.

Education

B.S. Computational & Applied Mathematics

Jan 2025 – Aug 2026 (Expected)

University of South Florida

- GPA: 4.0/4.0
- Relevant Coursework: Multivariable Calculus; Computational Linear Algebra; Probability; Statistics II; Differential Equations; Graph Theory; Cryptography.

A.A. Computer Science

Aug 2015 – Aug 2017

Hillsborough Community College

Experience

Cloud Consultant Intern, ProServe (Data & ML Specialty)

May 2025 – Aug 2025

Amazon Web Services (AWS)

- Delivered 80% faster safety-compliance answers via hybrid retrieval + cross-encoder reranking on a fully serverless stack.
- Built a production document-intelligence (OCR/NER/PII, summarization, RAG over NIOSH) using Software Engineering best practices and Textract, Comprehend, Bedrock/Agents.
- Validated resilience and cost with Monte Carlo sims (volume, Lambda duration, SQS latency, error rates).
- Built an analytics UI (React.js, Three.js); architected a DynamoDB data lake with Athena querying (99.99% availability; 30% faster query times).
- Automated GDPR rights workflows, secure data export, WAF protections, and Cognito identity; defined infra with CloudFormation.

Cloud Consultant & Full-Stack Web Developer

Jan 2024 – May 2025

Green Pipe Analytics

- Developed responsive MERN applications and integrated analytics pipelines to support data-driven insights and ML initiatives.
- Engineered GraphQL and Apollo microservices (-65 ms avg query latency); standardized Tailwind CSS and DaisyUI components (+15% delivery speed).
- Deployed and managed hosting and DNS with 99.9% uptime; delivered Azure resource frameworks for multiple clients (-30% infra cost, -40% deploy time).

Director of Information Technology

Jun 2022 – Aug 2024

Stan Weaver & Company

- Directed IT integration during the Cors-Air to Stan Weaver merger, consolidating infrastructure, workflows, and tenants; migrated 200+ users into a shared hybrid domain, unified Microsoft 365 email, and standardized DNS and group policies, boosting efficiency by 20%.
- Built two on-premises data centers (power, cooling, monitoring) and integrated Azure resources into a hybrid cloud model; migrated the RDS Farm to Azure and implemented DUO authentication, improving uptime by 15% and reducing operational costs by 20%.
- Orchestrated a full overhaul of datacenter cooling and power distribution, stabilizing server environments, cutting energy consumption by 20%, and reducing costs by \$80,000 annually.
- Transformed unstructured ERP data into queryable datasets, reduced query times by 60%, and developed Power BI workspaces and ML pipelines, increasing business intelligence output by 40%.
- Improved user satisfaction by 50% through a new HubSpot CRM and help desk system with KPIs, a knowledge base, and automated workflows.

- Enhanced observability and security by implementing an ELK stack, phishing-awareness campaigns, Intune device management, and Azure AD RBAC; reduced downtime risks by 25%.
- Led a \$1M+ IT budget and a team of six professionals, driving modernization, mentoring staff, and ensuring continuous improvement in IT services.

Network Engineer

Feb 2022 – Jun 2022

Infotect Design Solutions (CSP)

- Hardened network security (firewalls, IDS, access controls); blocked 50+ intrusion attempts.
- Automated vulnerability scans with OWASP ZAP; remediated 15+ critical findings.

Network Administrator

Jan 2020 – Feb 2022

ITS Group (MSP)

- Managed contracts for VPN configurations and systems management and provided day-to-day technical support.
- Upgraded security protocols on 50+ critical servers, mitigating vulnerabilities and achieving 99.99% uptime, minimizing disruptions for 300+ servers and 1,300+ workstations.

Software Quality Assurance

Oct 2018 – Oct 2019

Fairfax Imaging

- Increased testing efficiency by 40% by designing and automating regression and functional test cases in C# using Ranorex Studio for a web-based OCR application.
- Identified and resolved 100+ application issues by leveraging Ranorex Spy for advanced object recognition and providing developers with clear, reproducible test reports.

Aviation Machinist (Active Duty & Reserves) | DoD Security Clearance – Secret

Apr 2011 – Jun 2019

United States Navy & Navy Reserves

- Developed meticulous attention to detail and problem-solving skills through 8 years in combined Active Duty and Reserves, specializing in aircraft engine maintenance, fuel systems, and lubrication systems; consistently met stringent deadlines and safety regulations.
- Consistently exceeded expectations in high-pressure environments by performing full-spectrum helicopter and jet engine repairs, inspections, and performance evaluations both ashore and aboard ships; demonstrated proficiency in troubleshooting complex mechanical systems.

Projects

Atlas Ingest — Intelligent Document Ingestion

2025

Independent

- Serverless ingestion/orchestration with EventBridge, SQS (FIFO+DLQ), Step Functions; extraction via Textract, Comprehend, Bedrock; indexing with OpenSearch.
- Compliance guardrails: PII tokenization, GDPR workflows, threat models, audit logging; IaC via Terraform, CloudFormation, and CDK.

Lyra Insight — RAG + Custom Models (AI Agent & Analytics)

2025

Independent

- Hybrid retrieval (FAISS + OpenSearch), cross-encoder rerankers; Bedrock and Hugging Face summarizers; Hugging Face FinBERT and DeBERTa sentiment (ONNX Runtime).
- BLEU, ROUGE, BERTScore evaluation; safety guardrails for hallucination/toxicity.

Quant Analytics Notebook — Risk & Backtesting

2025

Independent

- Simulations: GBM, Heston, bootstrap, copulas; backtests, stress tests, regime switching; option pricing via Monte Carlo.
- Metrics: CAGR, Sharpe, Sortino, Calmar, skew and kurtosis, ruin probability, time-to-recover.

Certifications

AWS: Machine Learning – Specialty · ML Engineer – Associate · Solutions Architect – Associate · AI Practitioner · Cloud Practitioner

Azure: Administrator Associate · Security Fundamentals · Data Engineer Associate · AI Engineer Associate

Other: Machine Learning, Stanford University · ISC2 CC · CompTIA Network+

Skills & Technologies

Programming Languages & Frameworks

Languages: C, C#, JavaScript, Python, Bash

Frameworks & Libraries: Express.js, React.js, Next.js, Node.js, Three.js, GraphQL, DaisyUI, Tailwind CSS, NumPy, SciPy, Pandas, Statsmodels, Matplotlib, Plotly, Scikit-learn, Webpack

Data Structures: Arrays, Linked Lists, Trees, Graphs, Hash Tables, Stacks, Queues, Heaps

Problem Solving: Logical Reasoning, Algorithm Design

APIs: REST, GraphQL

Architecture: Backend Development, Microservices, API Design

Databases: SQL, Amazon DynamoDB, Amazon Athena, OpenSearch, MariaDB, MySQL, PostgreSQL, MongoDB, Redis, Amazon S3; vector stores (FAISS)

ORM/ODM: Mongoose ODM

DevOps & QA: Docker, GitHub Actions (CI/CD), Pytest, OpenAPI, Postman, ESLint, Prettier

Cloud Platforms & Virtualization

Cloud Platforms: Amazon Web Services (AWS), Google Cloud Platform (GCP), Microsoft Azure

Cloud Services: PaaS, CDN, IaaS, SaaS

Cloud Technologies: Serverless, Event-driven

AWS Services: Amazon Textract, Amazon Comprehend, Amazon Bedrock, Amazon Bedrock Agents, Amazon SageMaker, Amazon OpenSearch, Amazon SQS, Amazon SNS, Amazon Athena, Amazon QuickSight, AWS Lambda, AWS Step Functions, Amazon EventBridge, Amazon S3, Amazon Cognito, Amazon DynamoDB, Amazon CloudWatch

IaC & Observability: AWS CloudFormation, Terraform, AWS CDK, CloudWatch

Virtualization & Containers: Hyper-V, VirtualBox, Docker

ML Engineering

Frameworks & Tooling: PyTorch, Transformers, Hugging Face (FinBERT), ONNX Runtime

Model Ops: model fine-tuning; model export (ONNX/TorchScript); evaluation (BLEU, ROUGE, BERTScore)

NLP & GenAI

Capabilities: RAG, embeddings, vector stores (FAISS), retrieval & rerankers, LLM integration (Bedrock, Comprehend, Hugging Face), PII detection & tokenization, summarization

Networking & Infrastructure

Networking Technologies:

Switches: Cisco Catalyst, Cisco Meraki, Cisco Small Business, Aruba, Mellanox, Dell Power Switches

Protocols: DHCP, DNS, TCP/IP, VLANs, VPNs, IPSec, RDP, VoIP, Wi-Fi, FTP, SSH, RPC, POP3, IMAP, SMTP, MQTT, WebRTC, HTTP, WebSockets, UDP

Security: Proxy Servers, Firewalls (Sophos, SonicWALL, WatchGuard)

Servers: DataOn, HP Proliant, Dell PowerEdge

Power & UPS: APC Symmetra, Dell MD PowerVault

Web Technologies: Apache, IIS

Systems & Security Management

Operating Systems: macOS, Windows (XP, 7, 8.x, 10, 11, Server 2003–2022), SUSE Linux Enterprise Server, OpenSUSE

Identity & Access Management: Active Directory Federation Services (AD FS), Entra ID, Active Directory, Group Policies, IAM

Mobile Device Management: ManageEngine, Microsoft Intune

Security Tools, Monitoring & Analytics: 1Password, DUO Authentication, Proofpoint (Email Security), Intermedia (Email), Wireshark, ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana, Plausible Analytics

Backup & Recovery: Veeam, Wasabi, Amazon S3

Business Applications & Tools

Enterprise Resource Planning (ERP): FACTS, COPS

Customer Relationship Management (CRM): HubSpot, Tiger Paw, Salesforce

Business Models: B2B, B2C, Subscription, Marketplace

E-commerce: Payment Processing, Shopping Cart Systems, Inventory Management

Content Management: CMS, Document Management, Knowledge Base Systems

Professional Services Automation: CenPOS, RangerMSP

Building & Infrastructure Management: ASHRAE BACnet

Project Management & Collaboration: Jira, Obsidian, Scrum, Agile, Cross-functional Teams

Communication Skills: Cross-functional collaboration, stakeholder communication

Productivity Suites: Microsoft 365, Google Workspace

Surveys: CSAT, ESAT

Data & Analytics

Business Intelligence: Power BI, Amazon QuickSight

Machine Learning: Polynomial Regression, Logistic Regression, Sentiment Analysis, Synthetic Data Generation, Retrieval-Augmented Generation (RAG), Data Mining

Deep Learning: Neural Networks, CNNs, Transformers

Natural Language Processing (NLP): Entity Recognition, Classification, Custom Sentiment Models, LLM
